

### Comments from previous participants

*“The repetitive character of the meetings, spread over a pretty long period of time: 4 meetings (instead of, e.g., just 1), same people during all meetings; this leads to some ‘team spirit’ and, above all, trust.”*

*“Very good facilitator, very good lecturers, friendly environments and interesting venues.”*

*“Boards will for sure ask ‘Was it worth spending the time and money?’ Simple question, simple answer: YES!!!”*

*“I think I have developed as a leader, but it has also led to some important insights about leadership in general and how to distinguish between different roles of my professional life. I think I am better prepared to take on leadership tasks in the future also if they differ from the tasks I have now.”*

*“Listening to colleagues with whom I disagree, and considering that their contributions may be positive.”*

*“Reshuffling the organization. Through the course I was helped in understanding the basic driving forces and the need for early adopters. Concentrating on those who are ready to change and use them to bring others.”*
